Competitive Solicitations Framework Working Group Final In-Person Meeting in Accordance with the Integrated Distributed Energy Resources Proceeding [IDER | R. 14-10-003]

The Competitive Solicitations Framework Working Group [CSFWG] of this proceeding began reconvening on June 10 after its Status Report filing. [If you are interested in joining this group or obtaining this meeting’s agenda, please contact Devin Rauss, Project Manager of Regulatory Affairs at SCE, at devin.rauss@sce.com or at (626) 302-4885.] In anticipation of the Final Report deadline on August 1, 2016, the CSFWG will be meeting on Thursday, July 14 to capture final positions, recommendations, and consensus items of the full group based on the work of each Sub-Team.

Background: The CSFWG was established to develop a competitive solicitation framework targeting the reliability needs within the areas identified by analysis performed in the Distribution Resources Plan [DRP | R. 14-08-013] proceeding. The IDER proceeding, in coordination with the DRP proceeding, “is responsible for developing methodologies to determine how distributed energy resources can meet system needs as an alternative to traditional investments, providing justification for meeting those needs with distributed energy resources, defining the services that may be bought and sold to meet the needs, and producing maps that indicate where distributed energy resources should be sourced.” The CSFWG’s interim Status Report was filed on June 1, 2016. Since then, the CSFWG determined that establishing seven Sub-Teams to address discrete and overlapping topics would be the most efficient path to achieving the group’s goals by August 1: 1a. Definition of Basic Distribution Services and Attributes, 1b. Resource Performance and Measurement; 2a. Additional Services and Valuation, 2b. Valuation Criteria; 3a. Distribution Loading Order; 3b. Double Counting and Incrementality; 4a. Timeline, 4b. Spectrum of Oversight, 4c. Roles of DRP, DPP, and Linkages; 5. Pro-Forma Contracts (inc. Reliability and Performance Requirements); 6. Customer Outreach; and 7. Multiple LSEs.

For procedural details on the Integrated Distributed Energy Resources [IDER] proceeding [R.14-10-003], commenting and the record development process, and the role of this working group within the proceeding, please refer to the “Administrative Law Judge’s Ruling Establishing a Working Group to Develop the Competitive Solicitation Framework,” issued on March 24, 2016. The ruling can be found at this link:
